Re: Docket No. DE-12-059

SREC Generating Company, Inc.'s Application for Class 1 New Hampshire Renewable Energy Certificates for the Electrical Production from Steuben Landfill's Methane-Burning Generators Pursuant to RSA 362-F Request For Additional Information

Dear Ms. Howland:

We are responding to a question we received on March 28, 2012 in an email from Barbara Bernstein, Sustainable Energy Analyst, inquiring about the SREC Generator's ("Applicant") GIS Number for the New Hampshire Application.

We have attempted to contact Ms. Barbara Bernstein via telephone to respond to the question and were unsuccessful.

At the present time the Applicant does not have a NEPOOL GIS Number and in accordance with NEPOOL and GIS procedures will not receive one until (i) the Applicant has successfully moved energy from the specific Generator in NYISO to ISO-NE and (ii) the GIS Administrator has successfully audited the transaction and related energy transfer. As a result of low energy prices in both the NYISO (Zone C where the Generator is located) and the ISO-NE, the Applicant has made a business decision not to move energy into the ISO-NE market until we have been qualified for the New Hampshire REC market. All of the process steps for obtaining a GIS Number by the Applicant have been completed and those steps include, but are not limited to, the following:

1. Executed the Non-NEPOOL Participant Agreement (dated February 21, 2012).
2. Registered and received an approved SREC Account with the GIS System.
3. Discussed with James Webb, GIS Administrator at NYSE Blue, who confirmed the Applicant's status in GIS System is complete with exception of the last step which is the actual transfer of certified energy from NYISO to ISO-NE. The Applicant explained to Mr. Webb the energy transfer will be executed subsequent to obtaining New Hampshire certification as a REC eligible facility.

The Applicant is recommending that the question of the GIS Number not delay the New Hampshire review of Applicant's submittal, and be handled as a last step item. That is, assuming all other New Hampshire requirements are met, a conditional approval could be granted with the obligation for the Applicant to obtain a GIS Number prior to receiving full approval.

We look forward to hearing from you and ask that you our consultant, John Tigue directly (johntigue3@aol.com or by telephone at 607-765-4839) should you have any questions

Sincerely yours,
